Pause Sled Base

Design: busk + hertzog

Pause Cantilever is a multi functional stackable chair - with its light and serene design it fits elegantly into the Pause range, which will fit naturally into modern architecture. The chair stacks compactly with up to 40 pieces and is available with seat and back in moulded veneer with laminate, linoleum or upholstery. The chair is produced with frame in bright chrome or powder coated tubular steel.

Pause Cantilever is developed for use in canteen areas and in rows for meetings, conferences etc. For these purposes linking device and trolley are available as well.

We reserve the right to make alterations.
