evolution® light

Clarke ■ Rendall
BUSINESS FURNITURE LIMITED

evolution® light is the brand new, minimally styled reception desk range from Clarke Rendall. It is available in a range of plain colour or woodgrain laminates and is a stunning, cost effective addition to the **evolution®** range. But what really separates **evolution® light** from other reception desks in the marketplace is the lightbox which is standard on all models. This beautifully engineered feature, finished in white lacquer or white solid surface material employs low energy consumption LED lighting to illuminate the front panel with a remarkably clean and even glow. You can specify a plain white opal acrylic or even choose from a range of coloured film options all as standard, and when you factor in the possibilities for logos and graphics, you can see that the potential of **evolution® light** is endless.

LCP-2W-RAL-F in ebony with white desktop edging and white filmed acrylic lightbox panel with black logo lettering
