| Elasticized Mesh Color | Black/Black Stripe or White/Silver Stripe  |  |  |  |

Swivel Chair

The modern Lordosis Lumber Support is swing mounted and is an integral part of the adjustable elasticized backrest. The perfect position advanced seating mechanism and seat tilt adjustment allows users to sit correctly with the body in a balanced posture while locking in numerous positions. The seat and backrest simultaneously follow the movements of the user and the seat surface can easily move beneath the backrest, which allows for enormous seat depth adjustment there by accommodating the shortest to the tallest user.

As a result, "Lordo" guarantees that the pelvis always remains in the correct position and reduces pressure on the thighs, thus ensuring blood flow, regardless of the user's posture when sitting. Lordo simply provides the most comfortable seat in the office today, ensuring many hours of productivity.

Contoured seat with waterfall front edge including extended seat sliding capabilities

Multi-functional armrests

Sled Base Chair

Lordo is available in various models for every application. The swivel task chair model features an advanced synchron mechanism which works together with the pressure-regulated elasticized mesh. The striped mesh is fixed to the backrest frame and has just a single layer which produces an ergonomic cushioning effect, making Lordo one of the most comfortable chairs you will ever sit in.

Backrest available in Black/Black Stripe or White/Silver Stripe.

White/Silver Stripe

**Black/Black Stripe** 

Single layer elasticized striped mesh provides incredible comfort and an ergonomic cushioning effect. Independently swing mounted Lordosis Lumbar Support provides unsurpassed lumbar support.

The Perfect Position advanced seating mechanism allows for exact seating tension which optimizes the back support. The seat sliding range enables all body sizes to be accommodated and the contoured seat with waterfall front edge allows users to sit longer without painful pressure points no matter what their function.
