## milanoflair

A transparent addition to the milano family.

Chairs with mesh backs.

Design: Wolfgang C. R. Mezger

**milanoflair: So many brothers and sisters, yet still an individual.**

The youngest member of the successful milano family has one central design statement: transparency. Realised in the fine mesh of the cover, this transparency allows the chair to fit easily and empathetically in a wide variety of environments, thus always enriching the setting for the observer.

Design: Wolfgang C. R. Mezger

milanoflair also provides enrichment for the user: The back of the chair shapes itself immediately and seamlessly to the contours of the back. Together with the ergonomically shaped seat, milanoflair ensures perfect comfort.

Fine design  
and workman-  
ship can be  
observed and  
felt in every  
detail of  
milanoflair.

## Notes

See the current pricelist for details, prices and terms of business. We reserve the right for technical changes, errors and colour variations. Some of the models depicted are special versions that are subject to additional costs.

Wood is a natural product. For our line of furniture, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the woods, there may be variations in colour. Differences in colour and structure are not grounds for product return but are rather a manifestation of the individual character of wood furniture. The natural beech wood tops on the tables in the buena series use so-called sliced veneers which always have a slightly different coloration from the solid wood used for the table legs. We therefore recommend stained table tops, edges and legs.
