## tempuro

Light and modern.

Swivel armchair with plastic back element

Design: Martin Ballendat

**tempuro:**  
**the new swivel armchair – made from a single piece,**  
**light and modern.**

The less expensive version of our successful tempus model: tempuro is a contemporary conference chair which manages without costly mechanisms while offering all kinds of comfort. This is made possible by a back support made from special, soft and yielding PUR shaped foam with a concealed spring-steel frame, which also provides a pleasant rocking motion, as well, of course, as due to the comfortably upholstered seat. Nonetheless, tempuro is a real lightweight, making it also ideal for temporary office spaces or flexible meeting rooms.

Design: Martin Ballendat

- One piece moulded PUR shaped foam element serving as back, arm-rests and seat support
- Spring steel core with optimised dynamics in the back shell
- Upholstered seat
- Low weight
- Two-colour design: back element in white or anthracite, seat according to choice
- Chromed or white column and base
- Casters optional
- Matches table systems such as torino, trust and state
- Good price-performance ratio

## Areas of application

### office

For greater flexibility: The light and reasonably priced tempuro is a great fit for office settings that change a lot.

## Overview of models

## Refined design – with many options.

Back, arm-rests and seat support in tempuro are designed from a single piece. Thanks to the open design, the back has the appearance of floating over the seat. Furthermore, the two colour design allows customised accents: the polyurethane back element is available in white or anthracite, with a free choice of colours and cover fabrics available for the seat.

Casters and height adjustment are optional extras which provide greater mobility in meeting situations.
